Marine Harvest Reports Fish Escape at Lime Point Site

Marine Harvest experienced a fish escape from its Lime Point farm near Klemtu on December 20, 2008. A sea lion gained access to a net during a winter storm and allowed a portion of the 45,000 Atlantic salmon weighing an average of 1.3 kilograms to swim away. The net damage was repaired and the loss was reported to provincial authorities as well as the Kitsoo/Xai'xais First Nation. The total number will be known once a recount of the fish remaining in the net is completed.
